

Contents

Review 1	Signed numbers, Algebraic expressions	4
Review 2	Equations	26
Review 3	Proportion and inverse proportion	52
Review 4	Figures	86
Review 5	Organizing and making use of data	160

Chapter 1 Calculating with expressions

1	Calculating with expressions	7
	Monomials and polynomials, and like terms / Adding polynomials / Subtracting polynomials / Multiplying and dividing polynomials by numbers / Using the Distributive Law / Calculations on expressions that contain fractions / Multiplying monomials / Dividing with monomials / Multiplying and dividing monomials	
2	Using expressions	17
	Evaluating expressions / Transforming equalities / Explanations using expressions / Using algebraic expressions to calculate area and volume / Properties of proportional expressions	
	Comprehension test for Chapter 1,	
	End-of-chapter problems	24

Chapter 2 Simultaneous equations

1	Solving simultaneous equations	29
	Simultaneous equations and their solutions / Using the addition/subtraction method / Using the substitution method / Solving equations with decimal or fractional coefficients / Various simultaneous equations / Properties of proportion and simultaneous equations / Simultaneous equations in the form of $A = B = C$	
2	Using simultaneous equations (1)	37
	Problems about the values for variables / Problems relating to numbers / Problems relating to prices / Problems relating to the number of articles or people	

3	Using simultaneous equations (2)	42
	Problems relating to speed / Complementary problems relating to speed / Problems relating to salt water / Problems relating to increases and decreases in number / Complementary problems relating to salt water and relating to ratios	
	Study seminar Simultaneous linear equations with three unknowns	

	Comprehension test for Chapter 2,	
	End-of-chapter problems	50

Chapter 3 Linear functions

1	Linear functions	55
	Linear functions / Rates of change / Graphs of proportion and graphs of linear functions / Slopes and intercepts / Domains	
2	Finding expressions for linear functions	62
	Using the rate of change and a set of x, y values / Using two sets of x, y values / Finding expressions for parallel lines	
3	Linear functions and equations	66
	Graphing equations / Solutions to simultaneous equations and the intersection of graphs / Graphs of linear functions and areas of triangles	
4	Graphs and figures	72
	Bisecting the area of triangles / Length of segments and equations	
5	Using linear functions	77
	Using linear functions	

	Comprehension test for Chapter 3,	
	End-of-chapter problems	84

8th grade

Chapter 4 Parallel and congruent

1 Parallel lines and angles	91
Vertical angles, Corresponding angles, Alternate interior angles / Parallel lines and angles / Interior and exterior angles in triangles / Using the properties of triangles / Classifying triangles	
2 Polygons and angles	96
Interior angles in polygons / Exterior angles in polygons / Finding the measurement of various angles	
3 Congruent figures	101
Congruent figures / Conditions for congruent triangles	
4 Proof setup	105
Hypothesis and conclusion / Proofs for the congruence of two triangles / Proofs that use the properties of parallel lines / Proofs regarding figure construction	
Comprehension test for Chapter 4,	
End-of-chapter problems	116

Chapter 5 Triangles and quadrilaterals

1 Isosceles triangles	119
Definitions, Converse of theorems / Properties of isosceles triangles / Proofs with isosceles triangles	
2 Right triangles	127
Conditions for congruent right triangles / Proofs with right triangles	
3 Parallelograms	133
Properties of parallelograms / Proofs with parallelograms / Conditions for parallelograms / Proving that a figure is a parallelogram	
4 Special kinds of parallelograms, Parallel lines and area	142
Rectangles, Rhombuses, Squares / Conditions for becoming special kinds of parallelograms / Parallel lines and area / Changing shapes without changing area	
Study seminar Midpoint theorem	
Comprehension test for Chapter 5,	
End-of-chapter problems	150
Complements Functions and figures	152
Complements Properties of circles	156

Chapter 6 Probability

1 Number of ways for an event to happen	163
Number of ways for an event to happen	
Study seminar Calculating to find the number of ways for an event to happen	
2 Probability	167
Meaning of probability / Basics of probability / Dice and probability / Complementary problems about dice and probability / Balls and probability / Cards and probability / Coins and probability	
Study seminar Probability that an event will not happen	
Comprehension test for Chapter 6,	
End-of-chapter problems	178

Chapter 7 Data Analysis

1 Quartile points and Box and Whisker Plot	180
Quartile points (1) / Quartile points (2) / Box and Whisker Plot / Relationship between Histogram and Box and Whisker Plot	
Let's review	186

Key points learned during the second year of junior high school	192
